We can discuss more but to me the last two paragraphs of this letter are sufficient to get the point across.

First Document: 10-28-2020 - Current NDEE permit  
Second Document: 5-20-2020 NDEE letter denying land application request  
Third Document: 10-16-2020 NDEE letter denying request – consideration now as special waste  
Fourth Document: Nebraska Alt En lagoon sample results and string of correspondence between R7, NDEE and HQ OPP – see request for OWM contribution to Doc 5 below  
Fifth Document: Draft OPP letter

Jeff/Diane

There is a long history of correspondence on this facility. NPDES, Pesticides, and Solid Waste involved.

Quick summary is: Alt En is using treated corn as a feedstock. NPDES permit just in place for discharge of non-contact cooling water (001) and land-app of process water contained in a lagoon and applied through a center pivot. See Doc 1. Permit includes GW monitoring/limits for five pesticides, supported by an approved plan.
